WINTER

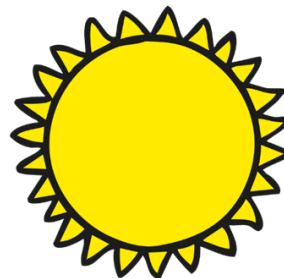

#### The change from Spring to

As the season begins to change from Spring to Summer, the temperature begins to rise, which means it gets even hotter!

During the summer, the leaves are green and there are lots of them.

Shadows are easy to see in summer and happen when an object blocks out some

As spring turns to summer the days get longer and the nights get shorter. Summer has the longest days and shortest nights of all the

## Staying safe in the Sun

The sun gives out rays of light and warmth. Some rays we can see but some rays are invisible. These invisible rays can cause sunburn and damage humans' skin and eyes, so it's really important to make sure we protect ourselves.

Wear clothes which will protect large

Put sun cream on exposed skin before going outside to protect against sunburn. Remember to reapply it when needed.

Wear sunglasses to protect your eyes from the strong and

Drink lots of water to keep hydrated and replace all the fluids which your body loses

Play in the shade, especially between 11 o'clock in the morning and 3 o'clock in the
